

Software and Database developer We are looking for a Software and Database Developer to our office in Malmö, Sweden. You will be working with our engineering team to provide actionable and data-informed insights that impact the quality of life for many people. We value insight driven innovation, collaboration, and feedback. This is a place where individual passion to improve lives directs our collective curiosity, which fuels the ideas, and projects we use our talents to deliver. Our organization and processes are fluid, allowing us to act quickly on emerging business opportunities. This should genuinely excite you. If so, let's talk.

About You

- You are confident, creative and a proven collaborator
- To put it mildly you're passionate about data science and how the applications can improve the health of fellow human beings
- You crave being on the edge of technology and thus constantly seek new insights
- You're proficient in undertaking your own assignments but at the same time enjoy collaborating in multidisciplinary teams
- Most importantly you back up your words with action

Requirements

- 3+ years of recent, industrial and solid experience as a database developer/DBA with MySQL, SQL-server or PostgreSQL
- 3+ years experience as a software developer applying scripting languages to text and data manipulation, such as Python, Java and shell scripting
- Higher level of technical education or hands-on experience with a self-made track record with references
- Very confident in a Unix or Linux environment
- Self-starter and very high degree of motivation to go above and beyond the task at hand
- Excellent written and spoken communication skills in English
- Experience in artificial intelligence/machine learning is a big plus
- Very able to function independently and as part of a team under aggressive deadlines, convey a strong professional image and exhibit interest and positive attitude toward all assigned work

We are an artificial intelligence company and serving the healthcare community in solving complex medical and clinical issues with point solutions on a global basis. Lytics serve customers and partner in pharma, medtech, wellness technology and medical clinics. We are an international company with our base in Malmö, Sweden. The company was founded on a substantial track record in applied solutions within artificial intelligence going back to the late 1980s. Today we manage and further develop our knowledge in our work in life science. For more information, visit www.lytics.ai

You can apply via email only. Please send application letter and CV to ida.karlsson@lytics.ai using the code SDD17 in the subject. The recruitment commences on July 20th, 2017 and will be completed before the end of August 2017. That said the recruitment process will be terminated when the right candidate is identified and hired.
